CONTENTS OF VOLUME 36

Number 1

B. A. CROUCH and J. G. WILLIAMS	1	Modelling of dynamic crack propagation behaviour in the three-point bend impact specimen
P. C. MILNE, L. W. MORLAND and W. YEUNG	15	Spherical elastic–plastic wave solutions
J. L. TEPLY and G. J. DVORAK	29	Bounds on overall instantaneous properties of elastic–plastic composites
D. NOWELL, D. A. HILLS and A. SACKFIELD	59	Contact of dissimilar elastic cylinders under normal and tangential loading
R. NARASIMHAN and A. J. ROSAKIS	77	A finite element analysis of small-scale yielding near a stationary crack under plane stress
Announcements	119	

Number 2

G. T. WARHOLA and A. C. PIPKIN	123	Rayleigh's problem for viscoelastic materials
B. WILNER	141	Stress analysis of particles in metals
B. BUDIANSKY, J. C. AMAZIGO and A. G. EVANS	167	Small-scale crack bridging and the fracture toughness of particulate-reinforced ceramics
J. R. RICE and M. SAEEDVAFA	189	Crack tip singular fields in ductile crystals with Taylor power-law hardening. I: Anti-plane shear
P. C. MILNE and L. W. MORLAND	215	A continuous loading solution for spherical elastic–plastic waves of small amplitude
G. J. RODIN and D. M. PARKS	237	A self-consistent analysis of a creeping matrix with aligned cracks

Number 3

A. MARCHAND and J. DUFFY	251	An experimental study of the formation process of adiabatic shear bands in a structural steel
D. CHIDAMBARRAO and K. S. HAVNER	285	On finite deformation of f.c.c. crystals in (110) channel die compression
R. BECKER, A. NEEDLEMAN, O. RICHMOND and V. TVERGAARD	317	Void growth and failure in notched bars
D. E. GRADY	353	The spall strength of condensed matter

Number 4

M. ORTIZ and A. MOLINARI	385	Microstructural thermal stresses in ceramic materials
M. J. JAFFAR	401	A numerical solution for axisymmetric contact problems involving rigid indenters on elastic layers
W. TRAMPCZYNSKI	417	The experimental verification of the evolution of kinematic and isotropic hardening in cyclic plasticity
D. J. NEVILLE	443	On the distance criterion for failure at the tips of cracks, minimum fracture toughness, and non-dimensional toughness parameters
D. DURBAN and W. J. STRONGE	459	Diffusion of self-equilibrating end loads in plane strain plasticity
J. R. DRYDEN	477	Elastic constants of spherulitic polymers
Erratum	499	
Announcement and Call for Papers	501	3rd International Conference on Structural Failure, Product Liability and Technical Insurance. Vienna, Austria, 10–12 July 1989

Number 5

P. J. BUDDEN	503	The effect of blunting on the strain field at a crack tip under mixed Modes 1 and 2
A. S. KHAN and X. WANG	519	On non-proportional infinitesimal plastic deformation after finite plastic prestraining and partial unloading
M. KEEFE and J. HOULTON	537	Penetration by stretching projectiles
J. B. HADDOW and R. W. OGDEN	551	Compression of bonded elastic bodies
J. C. AMAZIGO and B. BUDIANSKY	581	Interaction of particulate and transformation toughening

Number 6

G. W. MILTON and R. V. KOHN	597	Variational bounds on the effective moduli of anisotropic composites
S. SUZUKI, H. HOMMA and R. KUSAKA	631	Pulsed holographic microscopy as a measurement method of dynamic fracture toughness for fast propagating cracks
G. J. DVORAK, Y. A. BAHEI-EL-DIN, Y. MACHERET and C. H. LIU	655	An experimental study of elastic–plastic behavior of a fibrous boron–aluminum composite
B. STORÅKERS and B. ANDERSSON	689	Nonlinear plate theory applied to delamination in composites
Z. HASHIN	719	The differential scheme and its application to cracked materials
